 - ▶ Cole Hersee (Heavy Duty Switch Program)
 - ▶ ECCO
 - ▶ Hella
 - ▶ NOCO
 - ▶ Tycab Cable Range
 - ▶ Britax
 - ▶ Redarc
 - ▶ VDO

TRAINING

With the constant technological development in vehicles, JAS has always recognized the importance of staff training to best support and understand what customers are facing in the field. In 2017 a role was created within the JAS group for a full time staff training and development person. The first focus of this new role was creating online training courses in technical training for staff covering Air-Conditioning and Alternators and Starter Motor operation and accurate identification. The more our staff understand the operation and uses of the parts we sell the better and more efficiently we can serve our customers. The Technical support we now offer now encompasses over 50 short courses for Online Staff training, Videos on our eJAS website for common vehicle and product issues and over 150 Tech Tips that are emailed out on Tech Tip Tuesday.

The Online Courses are specifically tailored to sales staff so are not highly technical and are available for JAS customers. Tech Tips are developed from everyday issues that our customers encounter and where JAS assist the customer to work through these issues we then develop this into Tech Tips to share, knowing that it is entirely likely that someone else will encounter the same problem. We also actively mine automotive technical sites and supplier information to bring this to support our customers. JAS Technical Support can be contacted on 08 8268 0911.

SUPPORT

The JAS website has many benefits for our customers which includes access to the JAS online portal with price and availability for our complete range, a comprehensive vehicle search engine driven by Auto Info (Oscar) that also has VIN search and rego search by vehicle information. JAS customers can also review from our online portal their "account overview" which includes, account balance, orders and favourites. The JAS website also features latest news, product information, technical tips and monthly specials. To register or sign up for eJas and access to the JAS online platform please speak to your local account or branch manager.
